ABOUT ME

Software engineer with strong frontend expertise and growing backend knowledge. Experience in building interactive web applications using React, JavaScript, and modern UI practices. Currently undergoing SIWES training at Megamore Wireless Broadband in Kano State while expanding backend engineering skills.

PROFESSIONAL EXPERIENCE

SIWES Trainee

2026 -

present

Megamore Wireless Broadband - Kano State

- Undergoing industrial training in a broadband environment.
- Observing and learning backend and infrastructure-related technologies.
- Gaining exposure to real-world network systems and enterprise workflows.
- Developing independent engineering skills alongside placement.

PROJECTS

AgencyFlow CRM (Ongoing Project)

- Building a CRM platform for agencies to manage clients, leads, and project workflows.
- Developing dashboard interfaces for tracking client interactions and tasks.
- Implementing authentication, API communication, and structured data management.
- Designing a scalable architecture for features like analytics and automation.

Yum Brand Redesign

- Redesigned a fast-food brand interface to improve readability and layout structure.
- Applied modern UI principles and responsive design.

Travel Agency Demo

- Built a responsive travel agency landing page with featured destinations and hero layout.
- Implemented modern UI components using TailwindCSS.
- Structured interactive elements using JavaScript.

Gamified-To-Do List

- Developed a task management tool with points and leveling system to encourage productivity.
- Implemented dynamic interactions with JavaScript.

AI Coffee

- Built a concept tool that suggests coffee recipes based on user mood.
- Designed UI and interaction flow using HTML, CSS and JavaScript.

Classroom Polling & Q&A System

- Built real-time web application using React and WebSockets.
- Implemented live question posting and upvoting system.
- Designed interactive UI for classroom engagement.
- Structured backend communication with [Node.js](#).

Author Website

- Built responsive website using HTML, CSS, and JavaScript.
- Implemented grid layouts, carousel features and interactive UI elements.
- Structured dynamic contact section logic.

Cothing Store Frontend

- Designed modern e-commerce UI inspired by large-scale platforms.
- Built structured product display layouts.
- Applied clean UI/UX principles.

EDUCATION

Bayero University Kano, BUK
2028

2024 -

[B.Sc](#) Information Technology (In-Progress)

- **Coursework Includes:**
 - System Analysis and Design
 - Net-Centric Computing
 - Software Engineering
 - Object-Oriented Programming
 - Data Structures & Algorithms

Industrial Training (SIWES)
present

2026 -

Megamore Wireless Broadband - Kano, Nigeria

- Gaining exposure to networking infrastructure and backend technologies.
- Observing real-world telecom systems and enterprise workflows.
- Building independent software projects alongside training.

SKILLS

Programming & Web Technologies

- HTML5
- CSS3
- JavaScript
- [React.js](#)
- TailwindCSS

Backend & Databases (Learning/Exposure)

- [Node.js](#)
- [Express.js](#)
- MongoDB
- REST APIs

Tools & Development Environment

- Git
- Github
- VS Code
- Chrome DevTools
- Postman
- BrowserStack
- Jira

Concepts

- Responsive Web Design
- Component-Based Architecture
- API Integration
- UI/UX Layout Structuring
