ABOUT ME

Software engineer with strong frontend expertise and hands-on experience building modern, scalable web applications and digital products. Proficient in React, [Next.js](#), TypeScript, JavaScript, TailwindCSS, [Node.js](#), [Express.js](#), and database-driven application development. Experienced in developing dashboards, CRM platforms, real-time applications, authentication systems, and business-focused digital solutions, with a strong focus on performance, usability, and maintainable architecture.

PROFESSIONAL EXPERIENCE

Megamore Wireless Broadband - Kano State

SIWES Trainee

Mar 2026 - May

2026

- Undergoing industrial training in a broadband environment.
- Observing and learning backend and infrastructure-related technologies.
- Gaining exposure to real-world network systems and enterprise workflows.
- Developing independent engineering skills alongside placement.

AFRICAN DATA STRATEGIST - Lagos State (Remote)

Lead Product Developer

May 2026 -

present

- Selected as Lead Product Developer for an early-stage fintech/data company.
- Designed and developed the Forensic Probe Dashboard, an executive-style data monitoring interface.
- Built high-velocity data visualization and a “Strike-Zone” indicator for identifying financial/data anomalies.
- Worked on product architecture and frontend implementation for a data-security/operations product

PROJECTS

AgencyFlow CRM (ONGOING)

- Building a CRM platform for agencies to manage clients, leads, and project workflows.
- Developing dashboard interfaces for tracking client interactions and tasks.
- Implementing authentication, API communication, and structured data management.
- Designing a scalable architecture for features like analytics and automation.

Cedar Presidential Private School Management System (ONGOING)

- Designed the architecture for a scalable school management platform supporting 1000+ students.
- Planned role-based access for proprietor, principal, parents, and accountants.
- Designed academic, attendance, admissions, grading, fee management, and payment workflows.
- Designed PostgreSQL database structure and migration strategy.
- Planned Paystack/Flutterwave payment integration and multi-child payment functionality.

Forensic Probe Dashboard

- Designed and developed an executive-focused dashboard for monitoring high-velocity operational and financial data streams.
- Built interactive data visualizations and monitoring interfaces to surface anomalies and potential data/revenue leakage.
- Implemented a real-time “Strike-Zone” indicator to highlight critical logic anomalies requiring immediate investigation.
- Developed the interface with a high-contrast dark-mode design optimized for rapid executive decision-making.
- Structured the dashboard for scalable integration data sources, analytics and forensic monitoring workflows.

EDUCATION

Bayero University Kano, BUK
2027

Jul 2024 -

[B.Sc](#) Information Technology (In-Progress)

- Relevant coursework in Software Engineering, System Analysis & Design, Object-Oriented Programming, Data Structures & Algorithms, and Net-Centric Computing,
- Developed practical experience in software development, web technologies, databases and computer systems through academic projects and independent engineering work.
- Applied software engineering principles including system design, problem solving, data structures, application architecture, and development workflows.
- Combined academic training with practical software development experience across frontend, backend and full-stack applications.

Megamore Wireless Broadband - Kano, Nigeria
2026

Mar 2026 - May

Industrial Training (SIWES)

- Gaining exposure to broadband networking infrastructure, network systems and enterprise technology environments.
- Observing real-world telecom systems and workflows, developing an understanding of how networking technologies support business operations..
- Strengthened independent technical problem-solving and software engineering skills through practical learning and development alongside the industrial placement.

Technical Skills

Frontend Technologies

- HTML5
- CSS3
- JavaScript
- Typescript
- [React.js](#)
- Vite
- TailwindCSS
- NextJs

Backend & APIs

- [Node.js](#)
- [Express.js](#)
- REST APIs
- GraphQL
- JWT Authentication

Databases & Data

- MongoDB

- Mongoose
- PostgreSQL
- Redis

Tools & Development Environment

- Git
- Github
- VS Code
- Chrome DevTools
- Postman
- BrowserStack
- Jira
- Vitest
- ESLint

Automation & Testing

- Puppeteer
- Playwright

Architecture & Concepts

- Responsive Web Design
- Component-Based Architecture
- API Integration
- UI/UX Layout Structuring
- Database Structuring
- Database Design
- Authentication & Authorization
- Real-Time Web Applications
